# MAGNOS – Test Equipment

## **MAGNOS transport boxes in shipping condition:**

The box consists out of a stably welded frame and a, with a aluminum cover sheet encapsulated, solid wood body. Therefore the content of the boxes are effectively protected against outer influences during the shippment.

## **Upper section:**

A magnetic chuck with VERO-S interface and a VERO-S clamping station are stored in the upper section.

# MAGNOS – Test Equipment

## Upper section:

The magnetic chuck can be placed either individual or together with the VERO-S clamping station at the place of destination by the provided lifting magnet.

## Upper section:

According to the size of the magnetic chuck there is either a VERO-S 4-, 6- or 8-fold clamping station stored in the transport box.

Jahre

# MAGNOS – Test Equipment

## Accessories:

By unlocking of three screws a lateral cover at the box can be opened. Under this cover three drawers with the corresponding accessories emerge.

## Left upper drawer:

The fixed pole extensions as well as the cylindrical clamps and the workpiece stops are stored in this drawer.
