

SCHUNK Magnetic Clamping Technology

Individual workpiece clamping for all machining and processes

before

after

Advantages with SCHUNK:

Your advantage	Your benefits
Long-time experience	Optimal clamping solution for your application
SCHUNK quality	TOP quality and long lifetime
SCHUNK modular system	Flexible design of the workpiece - compatible with VERO-S quick change pallet system
SCHUNK Service	Initial operation, Inspection, Maintenance and Repairs for better results
Most holding force	Shorter processing times and better productivity
Patented status display	Higher security and process safety
Different types	For individual clamping solutions
Clamp within seconds	Shorter set-up time
Wide range of accessories	Optimal clamping of your workpiece's
Control unit is compatible with the CNC-machine	Automation is possible

General advantages of the Magnetic Clamping Technology:

- 5 side machining of the workpiece
- No deformation of the workpiece through clamping force
- Minimal set-up time and increase in productivity
- Increase in tool life and process reliability
- Lowest investment costs
- Highest flexibility
- Faster, easier clamping procedure
- Independent clamping system
- No risk of collision
- Simple handling
- Economic process
- Long lifetime
- No maintenance costs

Convince yourself: https://www.youtube.com/watch?v=IC74_wrbUf4

It's time to use your machine's full potential!
